

BURNER PRODUCTS

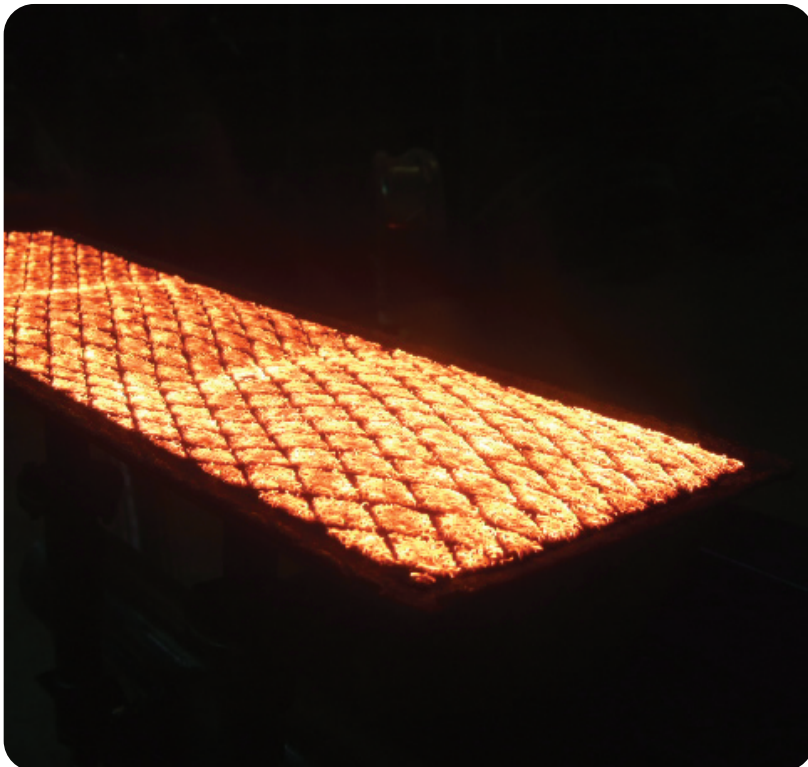

HIGH EFFICIENCY INFRARED BURNERS

The T⁴RAD product line is a high efficiency infrared burner line capable of meeting the needs of your unique application. The product can be made to order in many shapes and sizes. Our line of metal fiber burners has an operation range of 30,000 btu/hr/ft² up to 250,000 btu/hr/ft² in infrared mode.

BLUE FLAME PREMIX BURNERS

Our blue flame burner line is a unique line because we are able to offer various shapes and sizes, along with many different burner inputs. Our blue flame line is able to operate at firing intensities ranging from 300,000 btu/hr/ft² up to 3,000,000 btu/hr/ft². The burners utilize pre-mix surface combustion on surfaces ranging from perforated metal housings to metal fiber materials. These burners are great for commercial and industrial boilers, along with various other commercial and industrial applications.

ADVANTAGES OF USING PREMIX SURFACE COMBUSTION

- Rapid Heat Up & Cool Down
- Large Turndown Ratio & Operating Range (30,000 btu/hr/ft² up to 3,000,000 btu/hr/ft²)
- High Durability
- Ultra Low Emissions (single digit NO_x and CO emissions)
- Thermal Shock Resistance
- Uniform & Homogeneous Combustion

**OUR BURNERS CAN BE USED IN A
WIDE RANGE OF APPLICATIONS**
